State Summary

Key trends in 2017

- New York State's tourism economy expanded in 2017 with 4.4% growth in traveler spending, reaching a new high of \$67.6 billion-- 27% above the state's pre-recession peak set in 2008.
- Key data illustrate the industry's performance:
 - Room demand expanded 3.8% in 2017. However, a slight decline in room rates of 0.4% led to a total hotel revenue increase of 3.4% according to STR.
 - Passenger counts at all NYS airports increased 2.3% in 2017, though associated ticket revenue declined for the third consecutive year (down 3.3%).
- Personal income climbed 6.0% over the prior year, outpacing the general economy.

Headline results

- Travel & tourism is a substantial and growing component of the New York State economy.
- Direct spending of \$67.6 billion generated nearly \$109 billion in total business sales including indirect and induced impacts.
- Total income of \$36.5 billion was sustained by tourism activity in 2017.
- New York State tourism generated \$8.5 billion in state and local taxes in 2017, saving each NYS household an average of \$1,172 in taxes.

Tourism is vital to the NYS labor market

Unemployment Rate in New York State

2017

Source: BLS, Tourism Economics

- The unemployment rate in New York State was 4.7% in 2017. If the jobs sustained by travelers were eliminated, the unemployment rate would rise to 12.9%.

Traveler spending growth

- Traveler spending continued to expand in 2017, growing 4.4%. Excluding purchases of gasoline, traveler spending expanded 3.2% last year.
- As a result, the tourism economy reached another high in 2017, with \$67.6 billion in traveler spending.
- Traveler spending growth has averaged 4.5% per year since the recovery began in 2010 (compound annual growth).

New York Traveler Spending

Source: Tourism Economics

New York State tourism markets

- US domestic markets supplied 70% (\$47.2 bn) of the New York State's traveler spending base in 2017.
- International markets represented 30% (\$20.4 bn) of the spending base.

Traveler Spending by Market, 2017

Source: Tourism Economics

Broad-based growth

- Travelers increased their spending across all sectors except transportation in 2017. Higher prices for food and fuel factored into increase in traveler spending.
- Spending increased the most in retail and service stations, as gas prices rose significantly over the prior year.
- Growth was also strong in the food service and recreation sectors, increasing 5.1% and 4.8%, respectively, over 2016.

Traveler Spending By Sector

Source: Tourism Economics

Traveler spending distribution

- Traveler spending is diverse and well-distributed across multiple sectors of the economy.
- While spending shares remained similar to 2016, higher fuel prices shifted traveler spending back to transportation.

2014	\$ 43,533	\$ 1,638	\$ 17,285	\$ 62,456	
2015	\$ 44,045	\$ 1,540	\$ 17,493	\$ 63,077	
2016	\$ 45,570	\$ 1,461	\$ 17,755	\$ 64,787	
2017	\$ 47,219	\$ 1,556	\$ 18,858	\$ 67,633	
2010 Growth	5.8%	15.2%	16.7%	8.7%	
2011 Growth	7.1%	7.0%	11.5%	8.3%	
2012 Growth	6.6%	7.2%	5.2%	6.2%	
2013 Growth	2.4%	3.9%	6.0%	6.2%	
2014 Growth	6.1%	5.4%	3.7%	5.4%	
2015 Growth	1.2%	-6.0%	1.2%	1.0%	
2016 Growth	3.5%	-5.1%	1.5%	2.7%	
2017 Growth	3.6%	6.5%	6.2%	4.4%	

- Spending from all market segments increased, led by international travelers. Following a lackluster 2016, visitation and spending bounced back for both Canadian and overseas travelers alike. Despite strong growth from those markets, domestic spend remains the highest in terms of levels.

How traveler spending generates impact

- Travelers create direct economic value within a discreet group of sectors (e.g. recreation, transportation). This supports a relative proportion of jobs, wages, taxes, and GDP within each sector.
- Each directly affected sector also purchases goods and services as inputs (e.g. food wholesalers, utilities) into production. These impacts are called indirect impacts.

- Lastly, the induced impact is generated when employees whose incomes are generated either directly or indirectly by tourism, spend those incomes in the city economy.

Traveler-generated sales

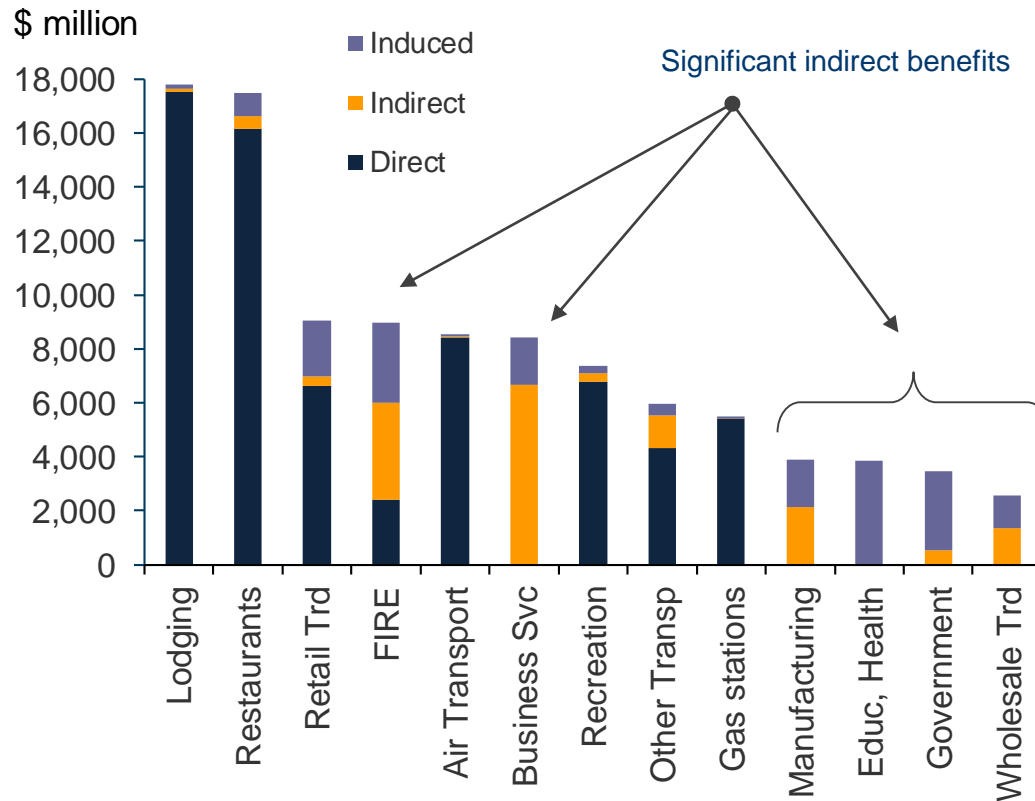

- Including the indirect and induced impacts, traveler spending generated nearly \$109 billion in business sales in 2017, increasing 3.7%.

Regional Summary

Traveler spending by region

Traveler Spending, 2017

- New York State is divided into 11 economic regions.
- New York City is the largest single tourism region with 65% of state visitor spend.
- New York City, Long Island and Hudson Valley together comprise nearly 80% of New York State traveler spend.

Upstate traveler spending by region

Upstate Traveler Spending, 2017

- Traveler spending across the upstate regions of New York is more evenly distributed (excludes NYC and Long Island).

Reliance on tourism

Tourism Share of Regional Employment in 2017

- Tourism is an integral part of every region's economy, generating from 6% to 19% of employment.
- Tourism is most important to the Adirondacks and Catskills, generating 19% and 16% of total employment, respectively.

Note: All regional and county tourism shares are calculated using QCEW (ES-202) employment and wage totals as produced by the NYS Dept. of Labor.

Traveler spending growth

Growth in Traveler Spending

- Traveler spending increased in all regions in 2017, generally at a lower rate than in 2016.
- The strongest growth occurred in the Catskills, Central New York, Adirondacks, and Greater Niagara regions.
- Growth in traveler spending was led by recreation and food & beverage spending. Additionally, higher fuel prices contributed to an increase in service spending.

Regional growth

- Sales, property, and hotel bed taxes contributed to \$36 million in local taxes.
- Jefferson County produced 49.7% of the region's tourism tax base in 2017.

Tourism-Generated Taxes, 2017

Thousand Islands, tourism taxes

Tourism-Generated Taxes, 2017	Local Taxes	State Taxes	Total	Region Share	Tax Savings per Household
Jefferson	\$18,470,188	\$14,295,112	\$32,765,300	49.7%	\$754
Oswego	\$8,816,107	\$8,674,533	\$17,490,639	26.6%	\$385
Saint Lawrence	\$8,704,903	\$6,909,839	\$15,614,742	23.7%	\$377
TOTAL	\$35,991,198	\$29,879,483	\$65,870,681	100.0%	\$506

- Were it not for tourism-generated state and local taxes, the average household in the region would have to pay an additional \$506 to maintain the same level of government revenue.

Methods and data sources

- Household travel surveys from Longwoods International have provided key inputs in establishing traveler spending figures. This is a representative survey with a sample of more than 300,000 trips per year.
- Industry data on lodging, airport activity, Amtrak, and attractions inform year-over-year growth analysis.
- Employment definitions. The basis of our data and modeling is the Regional Economic Information System (REIS), Bureau of Economic Analysis, U.S. Department of Commerce. This is different than the NYS Department of Labor data source (ES202/QCEW). The main definitional difference is that sole-proprietors, which do not require unemployment insurance and are not counted in the ES202 data. For total employment (across all sectors), the difference is 20%.
- International methodology. Our approach is based the estimates on direct survey responses to the Department of Commerce in-flight survey and Statistics Canada data - constrained to BEA international balance of payments data.
- All employment and income results are constrained to known industry measurements for key tourism sectors.

Methods and data sources

- Local taxes are a build-up of individual categories (sales, occupancy, property). The model is not equipped to deal with individual exemptions such as Indian gaming.
- Second home expenditures are based on the stock of seasonal second home inventory. Annual average expenditures for housing are pro-rated to the season length to account for various levels of expenditures not accounted in visitor surveys.
- Lodging sector. Our models use survey information and constrains this to the value of the hotel sector in each county. This can vary from certain bed tax estimates of total revenue for several reasons. One is that the bed tax may only be based on room revenue while total sales for the industry may include other revenue sources (room service, phone, etc.). Another is that certain smaller establishments may not fully report or be required to report their revenue.

Methods and data sources

- Tourism Economics utilized the IMPLAN input-output model for New York State to track the flow of sales through the economy to the generation of GDP, employment, wages, and taxes.
- The impacts are measured on three levels:
 - Direct impact: The immediate benefit to persons and companies directly providing goods or services to travelers.
 - Indirect impact: The secondary benefit to suppliers of goods and services to the directly-involved companies. For example, a food wholesaler providing goods to a restaurant. The model is careful to exclude imports from the impact calculations.
 - Induced impact: The tertiary benefit to the local economy as incomes in the prior two levels of impact are spent on goods and services. For example, a restaurant employee spends his wages at a grocery store, generating addition economic output.

About Tourism Economics

- Tourism Economics, headquartered in Philadelphia, is an Oxford Economics company dedicated to providing high value, robust, and relevant analyses of the tourism sector that reflects the dynamics of local and global economies. By combining quantitative methods with industry knowledge, Tourism Economics designs custom market strategies, project feasibility analysis, tourism forecasting models, tourism policy analysis, and economic impact studies.
- Our staff have worked with over 100 destinations to quantify the economic value of tourism, forecast demand, guide strategy, or evaluate tourism policies.
- Oxford Economics is one of the world's leading providers of economic analysis, forecasts and consulting advice. Founded in 1981 as a joint venture with Oxford University's business college, Oxford Economics is founded on a reputation for high quality, quantitative analysis and evidence-based advice. For this, it draws on its own staff of 40 highly-experienced professional economists; a dedicated data analysis team; global modeling tools; close links with Oxford University, and a range of partner institutions in Europe, the US and in the United Nations Project Link.
